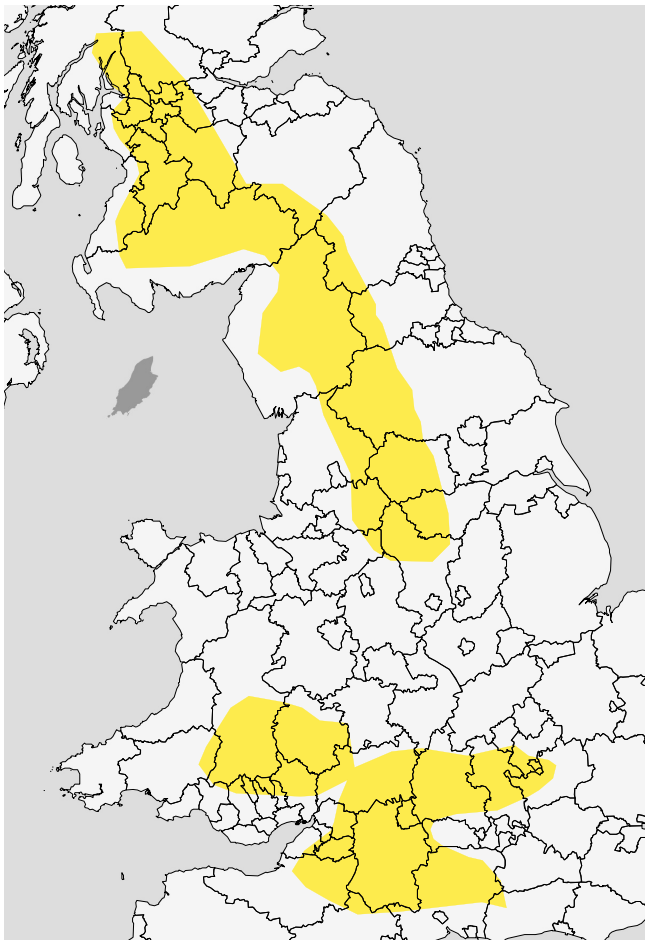
Yellow warning
Ice

Between
15:30 Fri 7 Jan 2022 and
23:59 Fri 7 Jan 2022



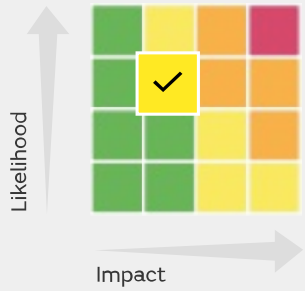
Icy surfaces are possible for a time on Friday evening and overnight, leading to potentially tricky conditions.

What to expect

- Probably some icy patches forming on some untreated roads, pavements and cycle paths
- Where these occur, an increased likelihood of accidents or injuries.

Further details

Early wintry showers in the north, and rain, sleet and hill snow further south will leave surfaces cold and wet by early evening. Clear spells for a time will allow ice to form in places, particularly for evening commuters, before temperatures trend up after midnight. The warning area highlights areas considered most likely to see ice.



Medium likelihood of low impacts

Issued at 12:38 Fri 7 Jan, 2022
